JH Valentine, a prominent cattleman from the Osage reservation, says that hundreds of head of cattle and horses were drowned in the swollen streams there the past week entailing ruinous losses on many stockmen. Over the line in the Cherokee nation he says it is still worse, C Hayden alone having 400 head drowned in the Grand River, Joel Bryan 200 head, and Jack Filey 100, with scores of smaller losses, bringing the number of cattle drowned in that section in excess of 2000.

Hennessey, O.T., Jan. 1.—A big wolf drive took place near the Cherokee line, fifteen miles east of here, today. A territory of one-half of the township was driven, about 150 sportsmen taking part. Eighteen coyotes and seven grey wolves were killed. A number escaped by one line disobeying the orders in closing too quick. A cougar was routed by the dogs, but escaped. Several cattle have been mysteriously killed in that vicinity this winter and the presence of the cougar explains it. A hunt will be made for him.

A practical test of the utility of the horseless carriage is to be made in Cleveland, O., where it is proposed to run horseless carriages on time schedules for the transportation of passengers over regular routes to different part of the city for a fare of only 2 ½ cents. The carriages to be used are noiseless gasoline motors and they are expected to be in use by June 1st. The result of the experiment will be awaited with interest, and should it prove a success other cities will not be slow to introduce it.

Married—on Thursday last, at the residence of the bride's parents, Mr. Alexander Roberts and Miss Maud Turner, Judge Leary officiating.

Born—to Mr. and Mrs. Robert J. Ray, Sunday, Dec. 22, a son. The bright spirit ushered into existence was early transplanted to a brighter clime, its little life fading away only a few hours after its birth, and its mortal remains were tenderly consigned to the tomb. Friends are informed that the mother is resting and rapidly regaining usual health and strength.—*Woodward News*

At the recent term of court in El Reno, Gene Hayes was found guilty of manslaughter in the first degree.

A strange scene was witnessed in Arapahoe on Sunday, week last. While Rev. Sims, a Methodist preacher, was preaching in the court house, Perry Reynold, a Cheyenne Indian, came in accompanied by his wife carrying her papoose on her back, all being dressed in regulation Indian style, and after the close of the sermon they went forward and had the baby baptized.

The case of the Territory of Oklahoma vs Temple Houston and JE Love, came up for trial last week in Woodward, and was continued for the term. The jury returned a verdict of manslaughter in first degree.

A contract has been let for putting the race tracks in good order, and Cheyenne will soon have one of the best tracks in the country.

Kuttle & Stahl are making extensive improvements to their place of business.

A Dead Desperado

Joe Beckham, formerly sheriff of Motley County, Texas, but latterly a fugitive from justice owing to his having murdered his successor in office, was shot to death by officers last week. It appears that the sheriff of Greer County received notice that the store of Al Bailey of Ronda had been robbed, and proceeded there with a posse. On his arrival he learned that two of Waggoner's cowboys had just reached town. Suspecting them as confederates they were placed under arrest and their trail followed back to their camp, where the robbers were discovered.

The thieves had taken possession of a dugout in the side of a hill, where they were firmly entrenched with solid rock on the front and sides of their retreat. The place was in the open prairie. There were twelve officers and four outlaws.

When the officers approached to within sixty or seventy-five yards of the dugout the thieves opened fire on them, and then began a fierce battle, which lasted several hours. Late in the night the firing ceased. Next morning the officers found that three of the robbers had escaped on foot, their horses having been killed in the fight, and on the floor of the dugout lay the dead body of Beckham.

When you hear a man sneering at the local papers because they are not as big, cheap or newsy as the city papers you can safely bet that he does not squander his wealth in assisting to make them better, and that generally the papers have done more for him than he has them. The man who cannot see the benefit arising to a town from its newspaper hasn't the sense of an oyster, and is almost as much value to a town as a delinquent tax list.—*Ex.*

The People Who Make Taxes

It is the same people who make the kick when they come to pay them. To talk and write about taxes is the fashion, and he who does neither is not considered a public benefactor. *The Oklahoman* will chip in its mite of writing for it, as it has done none of the talking.

Come with me and we will show you where the taxes are made, and when you have seen the process and the men who make them, you have my consent to do with them as the vengeance in your heart shall suggest.

We are in the country, and here is a house by the roadside. Let us enter. Ah! It is a school meeting, and the question is the tax levy. What shall it be? And after a short discussion they vote the limit. Yes and the limit is always a good per cent—half, or third or fourth of all the taxes paid. Again we go forth and are in the city. That large building is the court house, and court is in session. Let us go in and let us see if there is any tax making in there. This way to the grand jury room. Oh, no! Those men would not make taxes! They are to correct the wrongs of the county. They will investigate all the county officers and hunt out the criminals. Yes, but while they are doing that they are piling up taxes mountains high. All this energy and loyalty must be paid in taxes. The men in that grand jury room know but little about what evidence it takes to make a crime, and they

scour the county by deputies in waiting to bring in witnesses. A bill is found and the jury feels that each bill shows their zeal for the public welfare. When the court will keep them no longer they reluctantly ask to be discharged. Then everyman files the number of days in attendance and the mileage to the last mile. This is all taxes. Clouds of witnesses and lawyers follow in the wake of the grand jury when the cases are tried and they all apply without hesitation for their per diem fees and mileage. Again the taxes are piled as high as the clouds. Here is the commissioners' room. These are the fellows that make the taxes. Let us see. The room is full of people. These are familiar faces—the grand jury, the witnesses, the lawyers, and the deputies are all present, pressing their bills. There are some strangers; who are they? There is the man with court house fuel bills, court house stationery bills with some necessary books thrown in. There is a man from away down in the county who has built a bridge, or fixed a road, with his bill. Physicians with theirs for attending the poor. Merchants with their bills for jail supplies, etc. They will vie with each other in pressing their claims. The commissioners look worried. They listen to urgent appeals. They consult together. There seems to be no way but to allow all these bills. Here and there they cut a little and are assailed with looks of hate, or greeted with words of scorn. No one thinks of taxes.

The scene has changed. Men are seen on the streets, in the stores, along the highway and in convention. If you listen you will hear them say "the taxes are awful; what a set of scoundrels we have for officers! Why do they make our taxes so high?" They pass great resolutions. If you look closely you will remember them, their faces are not so serene and joyous as they were when you saw them in the grand jury room as witnesses, as jurors in the court room, or when all crowded in the commissioners' room, but it is the same old crowd.

Public officers are entitled to the support of all good citizens, and for any man to get up and publicly declare that there is "something rotten" in county affairs in one breath and it the next admit that his investigation has been cursory and without due preparations, shows that anything he may say should have no effect until fully substantiated.

A public meeting was held at the school house in Cheyenne last Friday for the purpose of giving some of our citizens a chance to let the world know what good material we have for the making of public officials. present officers is the best reason to be given for their removal. The speaker (Mr. McAnerny), commenced by reciting a list of wrongs perpetrated, but, to our knowledge, he made no accusation that cannot be explained or disproven; and if he actually believes that he has a case to present to the public we offer the use of our columns to him, but would prefer that he appoint a date to appear here and meet those whom he accuses in a public debate. He said that the amount involved in the suit taken to the supreme court was \$350, when it is nearly \$20,000 in this county alone and several hundred thousand in the territory. Another charge was that our sheriff had been paid more than the law allows. We have neither time nor inclination to investigate this, but hope that it is true, believing that ninety-nine out of a hundred of our citizens would invite the commissioners to "do it some more." There is no chance for him to get half what he is worth to the county. The assertion that some \$3,500 have been collected from the taxpayers for a sinking fund contains more wind than truth, there being today a total of only \$1,736.34 in that fund, a large portion of which will go to pay interest on bonds sold. As to the intimation that citizens are using the commissioners' court for the purpose of having their land surveyed at the expense of the county, those who have petitioned for public roads will probably be able to appreciate that for what it is worth.

The stockmen of our county should petition Governor Renfrow to use his influence in having the quarantine line restored to its original bounds so far as the territory of Oklahoma is concerned. Such a movement might save thousands of dollars.

It is refreshing to hear of an Oklahoma court doing a sensible act, and we take pleasure in noting that the supreme court of the territory has abolished the spring term of court in Roger Mills, Day and Beaver counties, thus saving the useless expenditures of thousands of dollars.

We are pleased to publish the call of Mr. McAnerny for a meeting of citizens. Every taxpayer has a right to enquire into the official acts of county officers, and there should be no objection so long as charges are not made in a reckless or vindictive spirit, or without giving a good chance for rebuttal. Let the charges be fairly made and met, then the people can judge for themselves.

Arapahoe, Feb. 17—Your correspondent has secured an account of the killing of one of our citizens, WW Glover, five miles west of this place. Mr. Glover, it seems, had gotten the confidence of two notorious outlaws, James Harbolt and George Miller, who are in the vicinity and laid a trap for their capture. He came to town Friday and notified the officers that these parties were in the county, and in the early evening six officers went to the home of Mr. Glover five miles west of town and hid themselves. Mr. Glover came home just after dark accompanied by the two outlaws. Mr. Glover was in his buggy and the other men on horseback. Glover drove near where the officers were in hiding, alighted from his buggy and walked a short distance. Miller got off his horse at the same time and went to the buggy to get something out, when one of the officers ordered him to throw up his hands. The outlaw disobeyed the order, however, and immediately drew their revolvers and began firing upon Mr. Glover, killing him almost instantly, then retreated, firing upon the officers as they went. There were about thirty shots fired in all. The officers are unable to tell whether either of the desperadoes were hurt or not. Officers and

The Cloud Chief Herald Sentinel says: Saturday night about twelve o'clock a man called at Vail Yates' house and claimed he had a sick horse and must have some drugs. Mr. Yates arose and went out to his store, only about two hundred yards distance. After the robber procured what he called for, he said he must have some meat. About that time another small man stepped in, and as Mr. Yates went to cut the meat he found himself looking down a couple of six shooters. They then blindfolded him, seated him on a chair, and requested him to be quiet or they would chloroform him. While one guarded him, the other proceeded to take what they wanted. They only found \$12 on Mr. Yates' person. They told him he had \$75, and that they needed it to pay a debt with, and must have it. They then marched him back to his house, captured his wife and demanded the money. Mrs. Yates had suspected something and had divided the money, and only gave them a part of it. They demanded the balance at once, and

she was compelled to give it up. They got about \$75 and all the goods they wanted, and after marching Mr. and Mrs. Yates out in the yard, mounted their horses and swiftly rode away.

From the Perry Democrat we learn that near Kintz post office is a new religious sect which calls themselves "The Church of God." They have been holding meetings almost every day since summer and have had many acquisitions to the faith. One of the principle beliefs is that of healing the sick with prayer. A woman in the neighborhood was afflicted with consumption of the lungs, and the leaders of this wonderful organization proceeded to pray for deliverance. The woman, so the story goes, got better and was assured that their prayers saved her life. Her recovery, however, was of short duration and she was soon bedfast again. These would be healers went to praying again, but the lady continued to grow worse until they gave up in despair, informing her that the reason their prayers were unavailing was that she had the devil in her and could not be cured. The natural consequence was the poor woman died, and her death no doubt was hastened by the terrible information she received.

the rush of the settlement of this land if it were declared to belong to the government when no preparation had been made for its opening. Certain members of the supreme court several weeks ago gave the indication to those interested that it would be well in legislative and executive action was taken looking to a decision favorable to the government. This would make the passage of an act of congress suspending the operation of all law against the present owners of land in Greer County in the event of such a decision and it would also necessitate a presidential proclamation warning all would be settlers to remain off the land until the contention of ownership from the Choctaw Indians could be settled. Temple Houston, RJ Ray and Judge Marum, of Woodward, and Bush & Grigsby of this city, attorney McKnight of Arapahoe and attorney Black of Taloga assisted the county attorney of "D" County in the prosecution. The testimony is purely circumstantial and it was all in Thursday night and the arguments commenced Friday morning. Hon Robt Ray opened the argument for the defense and was followed by attorney Black for the territory, who in turn was followed by Judge Grigsby for the defense; he closed his argument at noon and Hon Temple Houston followed for defense. The court room was packed, in expectation of hearing one of his characteristic and eloquent pleas to a jury and they were in no ways disappointed; he was followed by Mr. Gillette for the prosecution, after which the case was submitted to the jury. The jury after being out three days and nights agreed to disagree. This case was, with the others, continued until the next regular term of court. We understand that the Son case was considered to the strongest by the prosecution, and as the evidence is all circumstantial and not connected, it is possible that a conviction will not be secured, if not, the case will no doubt be dismissed.—*El Reno Globe*

COLLAPSE OF THE POPS

Strangled by their own Imbecility

The great meeting where democracy was to be slain to pave the way for populism is a thing of the past—and so is populism in Roger Mills County. The latter strangled itself with envy, hatred and malice, administered by one of its apostles whose

ideas of truth and fair dealing are so dead that they stink.

We have listened to many men whose only claim for recognition rested on the strength of their lungs and the abnormal development of their gall, but our pop carried off the palm at the above meeting.

If county affairs were less important than they are to the taxpayers we should hardly feel justified in noticing such an exhibition of asinine stupidity mixed with venom and prompted by craving for office, but when vile charges are made against county officials without a shadow of reason and with the sole object of self interest, we deem it our duty to expose their author for the benefit of those who luckily escaped the infliction of having to listen to such rot.

Mr. Joe Miller was called to the chair and introduced Mr. McAnerny, who preceded the reading of charges by stating that their number amounted to hundreds and that he would have time only to enumerate about a twentieth part. The charges were:

- Taxing the people without their consent for road and bridge purposes
- Levying and collecting taxes and misappropriating same
- Hiring special attorneys
- Allowing county superintendent twice the amount of salary due
- Collecting three times the amount allowed by law as a sinking fund
- Ordering warrants issued in violation of law
- Not publishing proceedings in accordance with law
- Appointing road viewers contrary to law
- Appearing in court against taxpayers and in favor of bondholders
- Refusing to spend money for building purposes while allowing other exorbitant bills
- Taxing the poor man’s hog and steer while leaving untaxed county officer’s salaries

Cheyenne Sunbeam

- Making late publications of commissioners proceedings and wholly suppressing some issues of the county paper
- Allowing bills over the four percent limit
- Nullifying bill of rights and usurping legislative authority of congress and of the territorial legislature
- Hypnotizing other members of the board and all the people of the county
- Searching heaven and earth to raise taxation

Mr. McAnerny then stated that over \$8,000 had been raised for salary of county officers, and that one assessor had been paid \$220 for his services.

Mr. EE Tracy, county superintendent, was the first to refute the charge against him, and proved that not only had he not overcharged the county for services rendered but that his bills were less than the law allows.

Judge Harrison then took the stand and dealt with the charge relating to the sinking fund. In that matter he proved that the board acted with the greatest caution going to the trouble of consulting not only the county attorney but the district judge also, and it was on the latter's instruction that action was taken.

Mr. Francis, chairman of the commissioners court, was the next to puncture some of the windy fallacies advanced, and commenced by referring to the law governing the opening of public roads, which plainly provides for just such action as has been taken, and making the same mandatory. He then referred to the \$1000 fee for taking case involving \$20,000 to the supreme court, and defended the action of the commissioners in that transaction to the entire satisfaction of his audience. Attention was also drawn to several extraordinary expenses which the county has had to bear—the O'Hare case having cost not less than \$2000. He proudly compared Roger Mills' county affairs with all other counties in the territory, and referred to a remark made by

Judge Burford whilst on the bench here to the effect that Roger Mills was better officered and more economically run than any other county in his district. As to the \$8000 raised for salaries, Mr. Francis proved that assertion to be false, the records bearing him out when he stated that they amounted to but little more than \$3000. The \$220 said to have been paid to assessor was proven to be only \$56. The charge of transferring money from one fund to another was fully explained, and it was shown to have been done according to law and that a saving of from 50 to 60 per cent to the taxpayers was made by such change.

Owing to the fact that Mr. McAnerny refused to give any information as to the charges to be preferred there are some things that were not fully gone into, but the citizens are well satisfied with what has been explained, and the charge of corrupt practices has been transferred to those making them.

As to the Sunbeam suppressing issues of the paper containing official notices or proceedings, we declare that the charge is maliciously false. Maliciously, we say, because the pop making them had asked, and been accorded, the privilege of examining the file of said papers kept in this office weeks before he brought those charges. He could have gone to the post office and examined the record had he really wanted to know whether those issues had been suppressed or not.

From later reports of the killing on Oak Creek, in G County, we learn that Harbough was not in it, but that the desperadoes who killed Mr. Glover were named George Miller and Red Buck, alias Gant. Ever since the Glover murder a posse has been on the trail of the desperadoes running them to their hiding place on the Canadian river, some thirty miles north of Arapahoe, then south to the Wichita mountains, where they separated, each starting on the back trail. This movement was discovered by the officers, who tailed them to

Elm and from there to Oak Creek at the home of the man Picklesimon, whose house was surrounded by the posse during the night. Some two hours after sunrise the next morning George Miller and Picklesimon came out and started to the lot to feed their horses. The officers called on them to surrender, when Miller went for his gun. Just then a ball struck him and he made for the dugout, call on Red Buck to come to his assistance. Red Buck appeared promptly and shot Officer Valentine in the abdomen, the ball passing out just above the hip, making a serious but not necessarily fatal wound. The firing was kept up on both sides until Red Buck was killed and Miller had retreated into the dugout. After some time Miller called to the officers to come to him as he was shot all to pieces. An examination showed that three fingers had been shot off his left hand and his right arm broken in two places. The dead and wounded were taken to Arapahoe. Both men were desperate characters and have committed many crimes in this country as well as in Texas. They were with Joe Beckham last December when he got killed in a fight with Texas Rangers, Red Buck having been wounded in the left shoulder in that fight. The posse was out nineteen days and traveled several hundred miles over some of the roughest country in the territory.

Farmers are busy plowing for a big crop this year; stock is looking well, and the people generally are in good spirits.

By the way, we had quite a political speaking at the school house last night. It was given out in the neighborhood that Mr. Gold of Washita County, and probably other populist speakers, would address the citizens of Elk Creek on the politics of the day and organize a pop club in Roger Mills County, and the Hon WP Francis, chairman of the democratic central committee of Roger Mills County was invited to be present to defend the democratic principles. Accordingly there was a large gathering of the people of Roger Mills, also several from Washita County; in fact the house was filled to overflowing to hear the discussion of the two political parties.

Mr. Gold failed to appear, but was represented by his first lieutenant, Mr. Coleman of Washita County.

Mr. Coleman proposed to discuss which of the two platforms, the pops or democrats, was the most beneficial to the laboring class of people.

The meeting was called to order, and Mr. Sam Elliott, a pop from Washita County, was made chairman.

Mr. Coleman spoke first in favor of the populist side. He addressed the audience for about one hour, and made a splendid speech for the pop's side. But it did not seem to affect the audience or convince anyone that his side of the question was right.

Then Mr. Francis stepped forward and took the floor in defense of democracy, and held the audience spellbound with his comparisons of the pops' platform to that of the democrats', and at time the audience applauded so that he was forced to stop speaking until quiet reigned. It was a complete victory for Mr. Francis and the democratic side.

The meeting was adjourned by the populist chairman without organizing a pop club, and a great many left for home.

Then Mr. Francis called them back for the purpose of organizing a democratic club.

Mr. Hudson was called to the chair, Mr. SI Margraves was made secretary, and we now have a club of nineteen members.

So hurrah for the first gun fired in our county for democracy; let the good work go on and democrats be democrats, and the victory of 1896 for sound and honest principles will be ours.

Respectfully,
Democrat.

The addition of Greer County to the Territory of Oklahoma will cut quite a figure in reducing territorial taxes, the property of that county being assessed at \$1,250,000.

The bill providing that all actual and bona fide settlers on the public lands in Oklahoma should acquire patent after five years' residence, upon the payment of the customary fees, without the payment of the price per acre required by the existing law, passed the lower house on Tuesday last with only one dissenting vote. Should this bill receive like treatment in the senate and at the hands of President Cleveland, it will be an inestimable boon to Oklahoma.

Justice Harlan handed down the opinion. The case involves 1,500,000 acres.

The case depended upon the construction of the treaty between this country and Spain made in 1819, which defined the northern and eastern lines of the Spanish possessions, which afterwards passed to Mexico and still later to the Republic, and then to the state of Texas. In this treaty a map known as Melish's map which had been made the year before was referred to and the lines fixed in accordance with the map. The Melish map did not correspond with the real facts as determined by astronomical observations in fixing the boundary lines, and it was soon ascertained that while all the territory known as Greer County was placed west of the 100th meridian the map showed it was east of it. The court held that the fact that the commissioners and surveyors were provided for in the treaty was evidence that it was not intended the lines as laid down in the map should be considered binding, and therefore accepted the fact as determined by the surveyors in preference to the showing of the map.

It was stated that Texas had in the settlement of 1850 relinquished all claims to the lands outside of her boundary to the United States, and received \$10,000,000 on this settlement. The contention of the state that Greer County had been organized since 1860; that its existence as a part of the state had been recognized by including it in the northern district of the state for judicial purposes and by the establishment of post offices as well as others were brushed aside by Justice Harlan, and a decree ordered entered declaring the county to be outside the boundaries of Texas and subject to the jurisdiction of the United States.

Justice Harlan intimated that Texas could appeal to congress for relief, but said the court must be controlled by the law and not by sentiment.

The president today issued a proclamation withdrawing the disposition under the

homestead law all that part of the public lands formerly known as Greer County, Texas, and reserving the land from settlement until a decision shall be reached as to the merits of the Choctaw claim to this county. Persons who settled therein prior to December 30, 1887, are not to be disturbed in the meantime.

ANNOUNCEMENT

For Superintendent of Public Instruction

We are authorized to announce HC Harris as a candidate for the office of Superintendent of Public Instruction, subject to the action of the Democratic primary.

For the benefit of those Texas papers which are misrepresenting this territory for selfish purposes, we state that the territorial taxes last year amounted to less than one half of one per cent on the taxable value of the territory. If Greer, or any other county, makes taxes high no one is to blame but the people themselves. The trouble with most of our counties is that they were run into debt by officials appointed by Governor Seay before the people had the privilege of voting. Still, with our present taxation, the stockman who makes his home in this county is better off than he would be in Texas paying both tax and lease. In Texas they tax a man for attempting to purchase a home. In Oklahoma a homestead is exempt from taxation until it is paid for. In Texas the stockman's cattle must keep off the state lands

unless said lands are leased. In this county free range is enjoyed. Now a little consideration of the above facts will show anyone interested enough to figure the matter out, that the man who owns say 100 head of stock in the county of Roger Mills, O.T., is better off by at least \$75 yearly than his neighbor in Texas.

The Agricultural College, at Stillwater, has an enrollment of 150 students. The senior class, graduating in June, numbers six. The spring term opens April 6. While the college makes no attempt to do the work of the normal school, the work of this term will be especially useful to teachers. Beginning classes will be organized in algebra, book-keeping, botany and rhetoric. In the preparatory department there will be classes in most of the public school studies. There are no fees.

Capt. WP Francis has received a commission from Adjutant General Geo Moorman, chief of staff of Gen. John B. Gordon of the United Confederate Veterans, to organize a camp of that order in this county, and next week a call for that purpose will be published in *The Sunbeam*. This is purely a social and benevolent order, and it is to be hoped that the brave old heroes who fought so long for a cause they deemed so just, and whose lots are now cast in this county, will hold themselves in readiness to respond to this bugle call and form a live camp in this county. The date will be announced next week.

The Sunbeam, in its capacity as representative of the best interests of the country, takes more interest in the selection of a representative in the legislature and of county commissioners, than in all other officers combined. It is time candidates for these offices were getting before the people and declaring themselves as to the courses they mean to take on the various matters to come before them. The Sunbeam has a few pointed questions to ask these kind gentlemen, and it will take no equivocal answers to them. Get before the people, gentlemen. They want to know whether you have any ideas about the duties of the offices you mean to fill and whether those ideas are the correct ones or not. If you haven't thought of a few things the territory and the county needs at the hands of the bodies to membership in which you aspire, you ought to be thinking more about running after a herd of sheep or a brindle cow than of running for these offices. The people will want some men who have thought a little about what they will try to do when elected, and they will want to know that they have thought right, and will keep thinking that way.

About Education

The rising generation cannot provide for and superintend its own education, and one of the

most sacred obligations of the present day it to make such provisions that the lamps of learning may be kept burning, for when once extinguished we know not whence.

“—that Promethian fire

That may their lights relume.”

Without guidance from the present generation future ones must relapse into barbarism. Every man interested in the welfare of society, whether he has children of his own or not, is interested in good schools, and no one should object to a reasonable sacrifice to support them.

Now the best way to promote the cause of education is to avoid all extravagance and abuse in the management of them. By mismanagement or bad judgment, subjects now bootless to discuss, the school districts of this county are, more or less, involved in debt—generally a great deal more. This, for the very cause of education, ought not to have been, and ought to be remedied. County Treasurer Hodges, himself always in favor of good schools, is authority for the opinion that the cause of education would have been better served had the people never depended on public money for the support of the school.

Surely no sensible man expects to promote the cause by paying teachers in depreciated or worthless scrip while the people are taxed to pay the interest on the indebtedness created by bad management in the different school districts.

Good teachers cannot be hired for poor pay, and boards of education cannot pay well, and it is not good management in anybody's financial affairs to depend on meeting current expenses with depreciated paper.

Indebtedness in the districts will kill the schools—that's a fact.

Now, the question is—not who is to blame, or whether anyone is intentionally guilty of wrong doing—but how to remedy the situation—how to have good schools this year and in the future.

Here in Cheyenne, for instance, what are we going to do? Let's look facts squarely in the

face. The district is some six hundred dollars in debt. When taxes are collected we may reasonably expect something over three hundred dollars in public money.

An approximate deficiency of three hundred dollars is not encouraging for this year's schools. But the entire indebtedness is not due this year. To get any benefit of the territorial funds at all the county must supplement it with sufficient revenue to make a three months free school.

This, with good management, the board of education may probably be able to do. But what is a three months school worth? Unless it can be supplemented by a private school of several months the money which it costs had better be devoted to charity or saved to the people.

The Sunbeam makes this suggestion: If the board sees its way clear to provide a three months school with public funds let it contract only with a teacher who has already agreed with private citizens for a term of three or four months private school.

The people should rally to the support of this system and pay for a private school which, by thus supplementing the public school, will result in some good to the children.

Abandon the idea of taxing the people to pay interest on heavy indebtedness while school teachers are paid in depreciated scrip.

If anyone has a better idea or suggestion than this, the columns of The Sunbeam are open to him.

Men brought their wives and children, children brought their appetites, young men brought their girls, and the girls brought their smiles, the occasion brought the politicians and the politicians brought their wind—and everybody brought good humor and fun, and “there was a sound of revelry by night”—also by day. People came in wagons, in buggies, on horseback, and in every way except afoot—no western man ever travels like a reptile. They came from Sandstone, from Beaver Creek, from Washita, from Elk Creek, from Long Creek, from Sweetwater, from North Fork, from Wolf Creek, from all the points on these streams from the headwaters to their mouths, and every mother, and every mother’s son and daughter of them came intent on having a good time, and they had it.

Only one mishap and that was the wreck of the flying jenny. The only damage to be lamented on that account was that three dogs, conveniently near, were not killed.

Tuesday evening people began to come in and go into camp preparatory for next day’s fetes, and early Wednesday morning every road and trail leading to the new Townsite was thronged with every kind of vehicle which could be pressed into service, and as the morning grew older the merry throng around the grounds was radiant with happy faces. The various refreshment and amusement resorts soon began to do business and continued it at a lively and profitable rate until Thursday morning, when, tired out, and sleepy, and yet without regret for the innocent fun they had enjoyed, the former revelers began to strike tents and round up horses for a return to their homes and everyday routine life. Early in the morning dancing on the platform under the spacious arbor began, and with only intermission of a couple of hours to give the speakers an inning, it continued until the small hours of the following morning.

Just before noon Major J.L. Keen, of the new town, mounted the rostrum, and in a short appropriate address, bade his guests a hearty welcome, breathing peace on earth and good

will to men generally. Then, to the music of a string band, the crowd, each member carrying a well developed appetite concealed about his or her person, marched around a long table piled with everything good to eat, while attendants with buckets of hot, strong coffee passed along dealing out generous cupfuls to all. Of course the piece de resistance was the barbecued meat, which was just done to the queen’s taste, and as abundant as the most hungry could wish. This was supplemented by a bountiful supply of all those good things which western housewives know so well how to get up. After everyone had feasted to satiety many white loaves and several brown quarters of beef, with quantities of minor delicacies, remained to be cared for and served afterwards for an elegant supper for the revelers.

Then came the speaking. Judge Garret, of Mangum, spoke first, and without referring to party issues, urged the people to unite in an effort to reduce taxation and to send only such men to the legislature as would be competent and willing to bring about some needed changes in our territorial code of laws. He was followed by Rev. J.R. Nigh, who spoke eloquently on the subject of education and morality. Judge D.W. Tracy, of Cheyenne, served as chairman, and introduced the speakers in a very happy manner. The committee from Cheyenne was accorded a few minutes in which to extend an invitation to the assembled multitude to attend our grand Fourth of July celebration, and, this done, the platform was turned over to the merry dancers, who, to the music of piano, violin and other instruments, chased the flying hours until Thursday morning and tired nature put an end to as successful and innocent a series of amusements as could have been devised.

Want of space prevents our doing justice to all concerned, but the committees, each member of which did his very best for the success of the affair, were composed as follows:

Mr. AL Thurmond is announced this week as a candidate for treasurer of this county. He is a young man of splendid business qualifications and well known integrity. He has always been a true democrat, and never having before asked public favors he submits his claims to an impartial people.

Johnnie Gober, at the Capital saloon, intends to make the public comfortable. To this end he will keep ice constantly and regale his customers with iced drinks.

Mr. JE Pullen, of Berlin, desires to inform the public that in a few days he will close his store there, and will not re-open again until about the first of July, when he will be on hand with a full stock of goods.

Mr. JS Gober, the former popular proprietor of the Capital saloon, has again taken charge of the popular resort and is better prepared than ever to treat his old friends and any new ones as well.

Mr. and Mrs. JA Colburn will leave next week for a visit to the Chicasaw country.

Mrs. WC Dysart, of Bowie, accompanied by her children, is on a visit to her brother Dr. JP Miller.

Mr. WB Johnson, present sheriff of this county, offers his services in the same capacity for another term provided the democratic primary of August 19 selects him as a suitable person to make the race. Mr. Johnson is a democrat up one side and down the other, and in all kinds of weather and every day in the year. He is certainly a pleasant and courteous gentleman, and having served the people for four years in this capacity, they know him. His record is before them, and it would be presumptuous for the

new management of The Sunbeam to attempt to give the people information about a man whom they know so well and who has served them so long. His claims are submitted on his record, and the record is before the people.

In 500 lb lots 10c cheaper on the hundred. Why not buy your goods in Cheyenne when you can buy them at these prices?

The weather still continues dry, and the country is beginning to suffer for rain. The harvest of the farmers will be light indeed without an early downpour. On the range water is beginning to get scarce and in some localities considerable apprehension is felt on that subject. Where water is plentiful cattle are putting on fat rapidly, as the grass is much more nutritive now than when more sappy, but scarcity of water in some localities is causing cattle to drift to the ranges most needed for winter feed. An early rain is much needed.

Let everybody prepare to come to Cheyenne on the Fourth, listen to the reading of our great Declarations of Independence, see the banners unfurled and hear the eagle scream.

The assessors, in their statistical report recently filed, got good religious and horticultural matters a little mixed. Instead of only seventeen church members in the county, all of one demonization, there should have been nearly three hundred including membership in all denominations, and the 466 acres of raspberries, 601 acres of blackberries

and 757 acres of strawberries, meant the same number of plants instead of acres.

The Glorious Fourth will be properly attended to in Cheyenne.

The new board of education for the Cheyenne district is composed of JR Casady, director, EG Thurmond, treasurer, and JW McMurtry clerk. This district has a good school house and a scholastic population of 84. The board is handicapped by a considerable debt, but it will endeavor to run as good a school as possible for the longest possible term. Whatever can be done under the circumstances will be done by this board, and no effort will be spared to do the most good possible with the limited means on hand. It must be plain to everyone however that unless public funds are supplemented by private means that the term cannot last long enough to be of any practical benefit to the children. Those who expect a good school may expect to go down into their pockets and help pay for it.

Drop in and see our new office; bring some news—and a dollar—the latter not necessarily for publication, but as evidence of good faith.

Visions of strawberries and cream vanish, or grow less bright, with the correction of the assessors' statistics reducing the number of acres of berries to a corresponding number of plants.

Attention Committees

There will be a meeting of the committees on the Fourth of July celebration at the school house tomorrow (Saturday) night, to lease the privilege of a dancing platform at the picnic grounds.

To Our Own People

Take notice that on the fourth of next month Cheyenne is going to give the grandest barbeque picnic ever seen in this country. Now, what each and every one of us must do is to prepare a big basket full of the very best things we can get up and bring it out to supplement the abundance of barbequed meat which will be prepared. Don't neglect this.

Tuesday night a number of representative citizens of Cheyenne met at the school house for the purpose of arranging for a proper celebration of the Fourth of July. On motion of Mr. E.G. Thurmond, Judge Davies was called to the chair and JW Putman was chosen secretary. Clebe Thurmond, for the committee on subscriptions, reported a sufficient amount of funds subscribed to insure a successful celebration and a good time generally, and this amount considerably augmented by donations from those present. JS Gober, Clebe Thurmond and WA Beaty were continued as a committee on subscriptions. EG Thurmond, JW McMurtry and JW Putman, to be assisted by Mesdames EG Thurmond, LA Beaty, AE Kirkman, CM Rosser, Dr. Miller, Joe Miller, WG Morris, HB Bradford, GW Hodges, WB Johnson, Zack Miller, WM Cheatham, AS McKinney and LL Collins, were appointed on general arrangements and preparations.

The privilege of lemonade stand was sold to JS Gober.

Messrs John Stahl, CM Rosser, GW Hodges and Zack Miller, were appointed as a committee to purchase meats and arrange for its cooking.

WB Johnson, CM Rosser, Zeke Stephens and Joe Miller were appointed as a committee to arrange details for the riding tournament.

GW Hodges, Zeke Stevens and JW Putman were appointed a committee on invitations.

It was decided to offer good prizes for the tournament, and perhaps for other contests.

Dancing will begin early at the school house and continue till the fiddler's arm drops off or the lads and lassies all get tired.

Arrangements will be made for every comfort of the people and for their complete amusement.

A big time will be had. Everybody will be here.

The committees will all meet at the school house one week from tomorrow night, and complete every detail for the grandest barbeque, picnic and patriotic celebration Cheyenne ever witnessed.

An extension of the stage line from this place to Hammon, 17 miles east of here, would give mail service to a great number of people who are now practically cut off from any conveniences in that way. A line runs

from Arapahoe to Hammon, and there stops. If it ran on to this point it would make direct connection between Canadian City and Arapahoe and furnish a thickly populated country with mail facilities. In no other part of the country, perhaps, would the establishment of so short a line accommodate so many people.

For the Fourth

Members of the various committees on Fourth of July celebration met at the school house last Saturday night to transact some business connected with the program.

Zeke Stephens was called to the chair, and business at once plunged into.

The privilege of placing a dancing platform on the picnic grounds was let to Will Rosser. Zach Miller and HB Bradford were placed on the tournament committee in places of Zeke Stephens resigned and Joe Miller absent. JJ Joyce was appointed to manage the table, with authority to select all the assistants needed. AA Hitchcock, B Jones, BF Rosser, AO Miller, TS Taylor, WW Anderson, "Cheyenne" Winslett, Will Dewey and HD Cox were added to the committee on management. JL Turnbough and JA Kimsey were appointed a committee to secure lumber and erect a table.

An adjournment was then had until next Saturday night, when all persons interested are requested to meet at the school house to further prepare details for the great celebration.

The committee on management has selected the grounds just in the southern portion of the town as the site for the festivities, and every good citizen is earnestly requested to come out next Monday morning with teams and tools to erect a spacious arbor and put the grounds in shape generally. Everyone is enthusiastic over the celebration, and a big time will undoubtedly be had. From all over the country people announce their intention to be here.

The New Town

The new town in this county about which so much has been said lately is attracting some attention and eliciting some inquiry. Always anxious to furnish the public reliable information on any subject of general interest, we will tell in this article all we know about this enterprise, and if we make the slightest error let someone correct it. Some time since, some gentlemen living south of here became desirous to live near a town, and not being willing to move to this one, concluded to move one nearer to them, or at least to make one nearer them. There is not a thing wrong in this, although Mahomet acted differently,

for when the mountain wouldn't come to him he went to the mountain. These gentlemen said a railroad was going to be built on a line about twelve miles south of here, and assuming that a station would be established at a certain spot on the prairie, a Townsite was surveyed off and everyone who wished helped himself to a lot, with a kind of general understanding that this particular location was to be the future county seat of Roger Mills County. These gentlemen may know just what they are talking about, and a railroad may be built through this county in the near future. We certainly hope so. It may run on the line picked out for it, and it may establish a depot just where the proposed town is. Others may know this. We do not. We do not know when a railroad is to be built through the county, where it will run nor where it will establish stations. Our experience with railroads makes us doubtful of anybody else's knowledge of what they are going to do. When a road is built through the county, the best town in the county, and most probably the county seat, will go to it, if it is not already on the line, but as to the town as it is. Its name is Berlin, and it is situated on a high hill about twelve miles south of this. The first business establishment was moved there from this place some ten days ago by "Uncle Johnnie" Richerson, who is now running a well-stocked saloon there. "Uncle Johnnie" is a big-hearted man, and ought to do well anywhere. Next, Mr. Pullen, a splendid gentleman, moved a little stock of goods and his store from Doxie up there. He hasn't many goods on hand now but he intends to get in a better stock. There is a very good well of water there. And now all is said that can be said. There is not another house of any kind there. So far there is no post office there, but proper steps are being taken to get one, with Mr. Pullen as postmaster. No one here wishes the good people interested there any disappointment, no one is envious of them. May their enterprise be rewarded by prosperity.

Dentistry

Dr. Overstreet, the dentist, will be in Cheyenne one week; he will be here from the 22nd to the 27th inclusive, and will be prepared to do all kinds of work in the dental line. See him at the Cheyenne hotel.

Attention Veterans

Three Pious Pilgrims Visit Our Sister City

♦♦♦

Sunday morning as the church bells were summoning the faithful to worship in this city a procession of three sad eyed Y.M.C.A. members listened sadly to the familiar chimes as they wended their way across the hills away from the soothing sounds in the

direction of Canadian City. They were sad because they knew that their places in the houses of worship would be vacant and because they were leaving the luxuries of city life to try the unknown resources of a Texas village. This party consisted of JS Gober, John Stahl and a representative of this great moral fashion journal, *The Cheyenne Sunbeam*, one dollar a year strictly in advance, advertising rates made known on application to the business office with proper references.

Noon found the little party near the head waters of the Washita, where, after horses were hobbled our frugal lunch was spread beneath the umbrageous trees, amid the wild plum bushes bending with their luscious red and yellow fruit. Fried chicken, lunch oysters and other solid delicacies constituted the main features of the feast, and the party composed entirely of democrats, three corkscrews were readily found with which the corks were soon drawn for the bottles of cistern water which had been duly packed around ice before leaving the city. The dinner was by no means a dull one, and after again hitting the road nothing occurred to break the monotony of prairie travel except a few stops for refreshment until the Texas line was reached. Here Johnnie Gober, after carefully examining around the ice in the back of the buggy, with serious countenance befitting the occasion, lifted up his voice and spoke thus:

“Boys, we have thirty miles of road before us and you can break me if we’ve got more than eighteen miles of beer left. Somebody has got to suffer—either us or the horses. I move it be the horses, and that we at once proceed to hit them on the legs. All in favor of the motion say aye, and those opposed keep mum. The ayes have it, the motion is carried. Proceed to hit.”

Acting on this resolution, at six o’clock we found ourselves duly welcomed at Paul Hoefle’s emporium of sundries near the depot at the thriving little city of Canadian. Here the dust of sixty miles of dry road was

brushed off and washed down after the regulation Texas manner, and soon thereafter we found ourselves comfortably quartered at the hotel D Fay, kept in first-class style by Mr. WW Owens, formerly of this city. Here we fared sumptuously until our departure for home.

Canadian City, the county seat of Hemphill County, Texas, is a typical western town with typical big-hearted western citizens. It contains two reliable banks, three or four large and several small mercantile establishments, one good newspaper, good school and church houses, a big lumber yard, a good livery stable, the best sheriff in Texas, and Paul Hoefle. A more complete directory of the business establishments there will be found in our advertisement columns, which show the sagacity of the business men there in reaching out for the trade of the best county in the territory through the columns of the best paper in the country. All this speaks well for the business men—and for the paper. One day was too short a time to do justice to our thriving little neighboring city, but it was all we had to spare this week and so Tuesday morning, after stopping at Paul's depot for supplies, we pulled out for home. Paul thought it best not to travel in hot weather with too many luxuries, so he only put in 25 pounds of ice, one case of Schlitz's chill tonic, half of a Whitaker ham, some pickles, lunch tongue, a dozen hard-boiled eggs and a few other articles of grub, with which we managed to make a frugal meal at our old camping place on the Washita, after which we had no trouble in reaching Red Moon, when, after refreshing ourselves in company with Geo Shufeldt and Mr. Beaty, we burned our bridges behind us in the way of disposing of the remainder of our supply of beverages and pushed on into this city—home again. Thus ended a very pleasant three days outing.

A large number of extra copies of The Sunbeam will be printed next week for distribution among the Fourth of July revelers. Parties wishing the attention of the public may make what use they please of the information.

Rev. HM Bandy, of Amarillo, will arrive in this city on the 18th of July for the purpose of holding a two weeks religious revival. Mr. Bandy is a Christian minister of much force and ability, and the prospects for an interesting time are good. Let everybody come and be instructed.

PS Doxey was in town Monday. He reports a heavy rain Sunday night in the southern part of the county, which filled all the water holes and put streams on a high lonesome, and if any on wishes to hear a good'n just ask him to give you his dentist story.

The Sunbeam representative on this trip to Canadian found that Peter Egan's boot shop is running in full blast. Dull times have no effect on his trade. That is what good work does for him. He and his man have all the fine work they can do. It will pay you to get your work done by Peter Egan.

Some of our farmers are cutting their corn stalks for fodder, the prospects for corn from early planting having dwindled with each succeeding hot dry day till they finally vanished entirely. There is some hope yet for late corn. This is but a repetition of former experience in this neck of woods. The early

corn catches the worm and the June drought too.

Dr. Miller is entitled to the premium this season for early roasting ears, he having enjoyed that luxury the first part of the week. The corn was planted late in April and its growth has been phenomenal from the start. The doctor sent away for his seed and is well pleased with his venture having secured a variety of corn which he believes will do well here.

WA Beaty and CM Rosser made a spin down the Washita to the Indian agency Wednesday. They found the Cheyenne and Arapahoe Indians, with the exception of old Red Moon himself, all gone off on the North Canadian to attend some kind of religious dance or festival. The government has advertised for bids for the erection of a school building to cost about \$12,000.

The post office at Red Moon has been moved from Geo Shufeldt's ranch to the store of CL Boyd half mile north of the old place. The road leading to the post office, and to Canadian, has also been changed, and parties going to either place must now, when they reach the Red Moon school house, turn directly north or directly west and go around section seven. Mr. Shufeldt is now strictly in the ranching business and doesn't wish a public road directly through his premises.

The arbor committee of the Fourth of July celebration met on Monday morning and decided to postpone the erection of the arbor till Monday next owing to the unsettled condition of the weather. Arrangements were made to have everything necessary on the grounds by that time, so that there would be no delay when the work commenced. CM Rosser, GW Hodges and Penn Nixon have volunteered to furnish the necessary material for supports and Sheriff Johnson will furnish the hay. It is proposed to have an arbor large enough to shelter all who come, and the

committee will see that it is constructed in an efficient manner.

School Indebtedness

The bonded indebtedness of the school districts of this county is as follows:

District #1, Cheyenne, \$1,300; #2, Denniston, \$200; #3, Red Moon, \$900; #7, Elk Creek, \$500; #10, Timber Creek, \$500. This indebtedness was incurred in the erection of school houses. We have so far been unable to get any satisfaction as to number of children sent, the average attendance, length of time schools have been taught, and the cost, but hope soon to be able to give the public as much information on this head as possible.

The Glorious Rain

It has come. The water holes are full, the streams are booming, the range is refreshed, crops are saved and it's still raining—not just sprinkles, but coming down in torrents. It rained hard yesterday for awhile and then last night all night, and as this is being written the streets are rushing torrents and the downpour continues. It seems to have been general with no indication of a cessation. Livestock had not suffered and were in fine condition. They will now put on fat as never before. Only the very early crops—and not all of them—were badly damaged, and this ground soaker will redeem the rest. Let the croaker cease to croak; let everybody rejoice, and come forward and subscribe for their home paper—The Sunbeam—only \$1 per annum, cash in hand, and we will rejoice with them.

Plant some windmills and double or treble the capacity of your range.

Oklahoma will never be admitted to statehood with a five per cent tax rate.

Anybody has a right to run for office, and anybody else has a right to be for or against him without any hard feelings.

Show Us a Reason

The stock farmer and the range men never have been able to occupy the same country in peace and never will be. The free rangers, like the Indians, have always had to move on as the stock farmers come up.—*Arapahoe Bee*

All of which means that the little valleys which constitute less than five per cent of the area of the western part of this territory may be utilized to bear uncertain crops and that the grass on the hills and plains which constitutes the rest of the country, shall grow up yearly and, un-cropped by domestic animals, shall rot without benefit to anything. Yell for free homes until you are hoarse, but when anyone thinks of converting the grass of the plains into taxable wealth foam at the mouth. "Lord, bless me and my wife, brother John and his wife—just us four and no more. Amen." So prayed the pious man whose soul was too small to make what we would at the present day consider a fair sample of a Christian; and now you pray, "Great Father at Washington,

give us these little valleys free; grant them to us, our heirs and assigns forever, with all appurtenances thereto belonging, without a single cent of cost, and do thou, great father, shoot the man who desires to use the grass in the same county with us, for it does our souls good to see it rot.”

That’s the spirit which inspires such expressions as the one quoted above.

Give us a reason why range men and stock farmers cannot live in peace in the same country. Let us understand why it is that only the valleys of this territory are to be utilized for the benefit of mankind and that the hills and plains are to remain useless as waste places upon the earth. If there is any reason for such argument except that demagogues, and papers expecting favors from them, wish to win the support of the small settlers by a pretended friendship and false professions of good will, use them for political effect, let us by all means, have them.

Now here are some reasons why stock farmers and range men should get along with the greatest amity and why their interests are identical.

The farmer is supposed to raise feed for sale, the range man buys it. The farmer has boys who wish employment during portions of the year; the range man gives it to them. There are taxes to pay in this county—yes indeed—and the more cattle there are assessed the less will be the rate on the farmers’ little improvements and few head of stock.

The farmers’ cattle strays from home just the same as the range man’s. The farmer cannot run a range wagon and keep an outfit in the field, but if he lives in peace and harmony with his neighboring range men the latter will turn the cattle, protect them and almost run them for him. There are many little ways in which the farmer can serve the range man so as to obtain a friendship which not only insures the farmer free grass but virtually free work. He can act fairly with the range man, give him information if his cattle

are doing injury somewhere or are off their accustomed range, and, above all, he can “shake” the demagogue who gives him bad advice just to please him and to get his vote. When it is known that he does this, his little bunch of milk pen cattle will be protected and driven by every cowboy on the range.

Why should the range man, like the Indian, have to move on before a class of men who are asking the government to give them—not the grass—but the earth free?

A large number of our citizens will note with pleasure the announcement in this week's Sunbeam of John B. Harrison for re-election to the important office of county attorney. Mr. Harrison's past administration of affairs connected with this office seems to have given entire satisfaction, although the short terms of court have not given him an opportunity to do all he had expected for the commonwealth. He hopes in the future, by counseling with the commissioners as to the best method of reducing taxation, to be of more service to the people. He even proposes, if necessary, to reduce the rate of taxation, that the already small salaries of the county officers be somewhat reduced. His claims are before the people.

Territorial Tax Rate

The territorial board of equalization has held its session and passed upon the tax rolls of the different counties, and has approved the valuation placed upon property throughout the territory by the various county assessors. The board fixed the tax rate for general territorial purposes at three mills on the dollar, with an additional half mill for the erection and support of a territorial normal school and another half mill for the erection and support of a territorial university, making a total rate of four mills on the dollar. The county commissioners meet early in the month and make the county rate, and then the people will know definitely to what tune of taxation they must dance.

When neighboring counties come to know that Roger Mills County has the lowest tax rate of any county in the territory they will be glad to throw in with us and help reduce all our taxes by uniting in the support of one set of officers and one county organization.

There is a great probability that Cheyenne will get a land office. The annexation of Greer County makes a land office in this section a necessity and here is exactly the place for its location in order that settlers in the surrounding counties shall be convenient to it. Let's go to work and locate it.

♦♦♦♦

When it costs the county \$18 to examine one little lady for a third grade certificate to teach a school in which there is not \$50 pay, there is much need of reform in our laws. That's the amount just allowed in such a case in this county. The court may have had no discretion in the matter, but certainly the law which authorizes such extravagance is at fault.

The Sunbeam will be enlarged next week.

Smith Kellum passed through town Monday on his way to Woodward with 400 head of beef steers.

Mr. JL Warren is building in town. He will move his family here before school opens.

The citizens of school district No. 12 have been busy this week erecting a commodious school house for the use and benefit of their children. Instead of issuing bonds, these sensible folks put their hands into their pockets and subscribed the necessary funds for material and then set to and did the work themselves, thus saving many dollars and putting themselves in a comfortable position financially. Such a start promises well for the future of the school and The Sunbeam wishes it unbounded success.

Last Monday morning there passed through Canadian, enroute to Yellow Stone Park, Wyoming, quite a menagerie in the shape of five full blood buffaloes, consisting of two big bulls, one yearling bull and one old cow. The government has purchased these animals from

Mr. Chas Goodnight, the Panhandle cattle king, paying \$1500 per head. The animals are in charge of Mr. GL Joel, who goes on to the park with them. Mr. Goodnight has about 60 buffaloes on his Panhandle preserves, and is crossing them very successfully with polled Angus cattle.

The grand tournament which was postponed on the Fourth on account of rain was run last Friday, and resulted in JS Gober winning first money, and Stoney Duke second money. Gober got 13 rings and made the run in 13 seconds, Duke got 12 rings, time of 14 seconds; EK Thurmond 10 rings, in 13 seconds; Joe Miller 9 rings, in 13 seconds, John Reed 11 rings, in 14 seconds and Frank Hunt 10 rings, 13 seconds. A nice concourse of people gathered under the arbor to see the gallant knights shiver their lance against each other's shields, speaking very metaphorically, and after the tourney fair ladies and brave riders danced upon the platform until after the chimes of midnight had ushered in another day.

Populist County Convention

The populists of the county are requested to meet in convention at Cheyenne on Wednesday, August 5, 1896 at 2 p.m. (1) To elect two delegates to the 25th representative district convention, and two delegates to the 13th council dist. Conv., both conventions to be held in Cheyenne on the 5th and 6th of August, 1896.

Several populist speakers of national repute will be present and discuss the political issues of the day. Come and hear them tell why taxes are high and how to reduce them; why times are hard and how the republicans and democrats made them so; and how the two old

parties will make them harder for the next four years if you give them a chance.

Two hundred delegates from the ten western counties of Oklahoma will be present.

By order of county committee.

Wm McAnerny, Secretary

Our Tax Rate

The voice of the people has been heard and their persistent demand for lower taxes is having effect. The tax rate in this county this year will be materially less than last—in some of the school districts nearly fifty per cent less. The territorial authorities, by levying a tax rate of 4 mills on the dollar, reduced the tax rate throughout the territory six cents on the hundred dollars. As will be seen by the proceedings of the commissioners court published last week, that body makes estimate for a tax levy which cannot exceed for general county purposes 21 mills on the dollar. This is a reduction of 37 cents on the hundred compared with last year. But where the big savings come in is in the action of the various school districts in voting materially less taxes upon themselves than in the previous year.

Through the courtesy of our efficient county clerk, Mr. AG Gray, we are able to give the taxpayers of each school district in this county the rate which they will have to pay this year according to the estimate just made, and the rate levied cannot be higher than this estimate. It may be lower, but will most probably be just as given here. The levy will be made today. In District No. 1 the rate for all purposes is \$3.85 on the hundred. Last year it was \$5.31. In No. 2 the rate is \$3.50. Last year it was \$4.42; in No. 3 the rate is \$4.80 against \$4.89 last year. In district No. 4 the rate is \$3.50 against \$4.14 for the previous year. In No. 5 the rate is \$2.65 against \$4.19 last year. In No. 6, Cheyenne township, the rate is \$3.10 against \$3.39 last year. In No. 6, Elk township, the rate is \$2.90 against \$3.29 last year. In No. 7 the rate is \$3.05 while it

Cheyenne Sunbeam

was \$4.12 last year. No. 8 has a rate of \$3.00 and paid \$3.39 last year; No. 9 pays \$3.50 this year and paid \$4.64 last year. No. 10 pays \$2.87 ½ this year against \$4.10 last year. No. 11 has a rate of \$2.80 this year and paid \$3.44 last year. No. 12 pays \$3.70 on the hundred, No. 13 \$3.25, No. 14 \$2.72 ½ and No. 15 \$3.50.

It will be understood that the territorial and county taxes are uniform throughout the county and that the different rates in the different districts are the result of local township and district taxation.

The rates, which are very materially reduced from last year's preposterous and exorbitant levy, are in all conscience high enough yet, but the people can push the good work along by selecting only the most prudent and honest men to make their laws and manage their county affairs.

It should be noticed that the reduction this year is made in the face of a decreased valuation of some seventy odd thousand dollars.

The democrat who thinks himself wiser or better than his party is, vulgarly speaking, too big for his breeches.

We have piped unto the candidates whose announcements we run, and some of them have not danced. Everybody dance.

If you are a democrat get in the middle of the road and whoop'em up a little for Bryan and free silver. The party has spoken.

The first contemplated improvement has been made in The Sunbeam. Its size is this

week increased by four columns of reading matter. Keep your eyes on it and you will receive another surprise some of these fine days.

Some of the populist leaders oppose the endorsement of Bryan because, with nothing to howl about, their occupation would be gone. But the leaders can't keep the honest rank and file of the party from voting for him just the same.

The Sunbeam has no time nor space to waste on the man who borrows his neighbor's paper to read every week and then stands on the street corner and predicts its failure because its editorials are not written to suit his peculiar ideas of journalism. A man who deadbeats his reading matter hasn't much right to criticize.

Steady, boys. Do not become excited in this campaign. The people are going to coolly select their officers having regard only to their peculiar fitness for their positions, and not with reference to any local prejudice that may be entertained in any part of the county. Let the best man win in this little free-for-all dash, and let us all be friends afterwards.

The Sunbeam being the only paper in the county and the only means of reaching the entire public, it would be sheer injustice to refuse the use of its columns for any legitimate purpose. Of course when people or parties expect direct benefit to themselves they must expect to pay for the space they occupy, for space is to the publisher what goods are to the merchant, his stock in trade, and neither can be given away and business conducted successfully. But in this respect everyone will be treated exactly alike and no discrimination made.

Understand Us

This is an industrial, not a partisan political paper. We have our own views as to what is

PUBLISHED EVERY SATURDAY

good for our little community, and shall not hesitate to express them. One of the best developed of these views is that the interest of the entire people, regardless of business occupations, is identical, and that only untrustworthy demagogues will argue that there is or should be in reason any antagonism between men engaged in different avocations. A paper could not be run in the true interests of stockmen without at the same time being operated to the benefit of the farmer. Their interests are the same, and only the irresponsible crank will argue otherwise. We advocate the policy of the government giving absolutely to the settler the little home he is trying to improve and live upon—give it to him without money and without price, that he may become a fixed, useful and prosperous citizen here, and that the money he would have to pay the government for this land may remain in the country and in his hands to support those whom he loves and to educate the children who are to become the future citizens of this territory. Is there any hostility to stockmen in this? We advocate a policy by the government which will allow the stockman to convert the grass on the untellable hills and plains into food for the human family—into taxable values for the support of organized government and the general prosperity of the country. Is there any hostility to the farmer in this? We advocate for the farmer and stockman the lowest possible tax rate that will support our municipal organizations. Is there any hostility to either in this? But why argue in this line? We have faith in the intelligence and integrity of these people, and know there are enough of them here who endorse independent, fair dealing with every class of people, to support a paper devoted solely to the people's interest, and to them, and not to the mischief making crank who sees in everyone else's prosperity his own enemy, do we look for a constituency. For them, and not for the deadbeat who reads a borrowed paper and then abuses it, is The Sunbeam published.

SLADE ON HIS RAMBLES

**He Takes In Kansas City and
Hobnobs with the Future President**

Again over the red hills, past the fields of darkly waving corn and billowy millet and sorghum, through the vast green ocean of

grass so rank as to rival clover fields; past fat, lazy cattle puffing contentedly by the limpid pools of water by the road side, Johnnie Gober and I, on a breezy Sunday morning, jolted and bumped along the road to the northwest. Into a shady grove, a splendid picnic dinner kindly prepared by the dainty hands of his sister, Mrs. Kirkman, and finished off with wild grapes and plums, a fragrant cigar, and again, "over the hills and far away," still bumping, up one hill and down another, disturbing drowsy cattle too lazy almost to get out of the way, away across the line into grand old Texas and on into the pleasant little city of Canadian, to the hotel Fay and comfort. But only a brief rest, and then on again, this time viewing the vast expanse of luxuriant grass and hundreds of fat cattle from the windows of the A.T. & S.F. railway cars, on to Woodward, where we spent a day pleasantly with the host of good fellows there, and of which thriving town I shall speak at length on a future occasion, and here taking leave of my pleasant traveling companion, Johnnie G., I was shipped as live freight by Bob Thurmond, who was making another shipment of fat stock. Then, in his company, on again and through thousands of acres of uncropped grass, on into Kansas—no longer poor old Kansas, but Kansas a wilderness of bending corn, and a paradise of grain and vegetables—Kansas teeming with everything the farmer has planted, past cribs half a mile long filed with last year's unsold corn crop, now worth ten cents a bushel; on pleasant little towns and prosperous farms into bustling, thundering, busy Kansas City, a place some larger than Cheyenne, and which would no doubt have made a first class city if the latter had not grown up in rivalry. The two cities now contain something like three hundred thousand population, somewhat the larger number living in Kansas City—a place where it is their boast that they bury their dead and leave none but live people to walk the streets. At present Kansas City has more improvements that Cheyenne, but we have

room to build up and make as big a town as that, and a good broad foundation is a great thing on which to start a town. Kansas City is noted for its food products, and especially for the amount of quality of meats it puts on exhibition. The supply seemed to be all right when we got there, but I have doubts about the food resources of the city when we left for Bob and JW Dunn, whom we fell in with there, had brought their appetites along with them, and I hadn't forgotten mine, and I am rather of the opinion that there was a marked improvement in the provision market after we had been there a day or two. The next president of the United States, the eloquent and considerably enterprising Mr. Bryan, with his interesting family, met us there, and seemed very glad to see us. A very large concourse of people gathered about the Coates House to see us and the future president, and our reception was very flattering and enthusiastic indeed. It is said there is a man in Kansas City who is not going to vote for Mr. Bryan, but he was out of town during our stay there. Judging from the reception given us and Mr. Bryan, he would do well to have us with him as he takes in the picnics during the pending campaign. As the train thundered along bearing us homeward amid the down pouring of rain and pealing of thunder, the echoes still rang in our ears: "Rah for Bryan! Rah for free silver! Three cheers! Whoop, whoop, hurrah!

P.S.: Kansas City is a column or two larger than The Sunbeam, and as we have not space enough for a detailed write-up of the city and a mention of each individual business and enterprise, and do not wish to discriminate against any of them, I must forego the pleasure of a minute description of the town.

The school board for this district held a very important meeting last Saturday in the office of Clerk McMurtry, at which arrangements were made for a six months school, as will be seen by the subjoined address to the people. This will be good news not only to the people of this town but to a number of others who will be glad of a chance to educate their children here. The people have a chance to build up a good school and no good citizen should fail to aid the board in every way possible. Here is the address of the board: To the patrons and pupils of Cheyenne school district. At a meeting of the school board it was ordered that school should commence September 14th, 1896, and run not less than six months, and that a first-class teacher be employed to teach same.

A Dead Indian

Last Sunday a gentleman came in from White Shield creek in the extreme eastern part of the county and reported that the remains of a man had been found in that country. Probate Judge Leary and Deputy Sheriff Rosser at once left to investigate. They found the dead man all right, impounded a jury of inquest, summoned witnesses and elicited the following information which Mr. Rosser kindly furnished. The Sunbeam: Some two or three weeks ago Mr. WP Peace, living in the neighborhood mentioned, while riding across the prairie came upon an Indian lying down, and, upon asking what was the matter, the Indian said: "Water—heap sick." Mr. Peace directed the poor fellow to a water hole a couple of miles away and rode on to the Washita where he reported the occurrence to the agent. The Indian had told Mr. Peace that he was Apache and the agent wrote to the commandant at Fort Sill receiving the reply

that a certain Indian had left the agency with permission of several months' absence and with money to take him to Arizona. The men sent out by the agent to hunt the Indian failed to bring him back, and as the clothes found near the remains were identified by Mr. Peace as the ones wore by the sick Indian, there is hardly a doubt that the remains were those of the unfortunate man he had directed to water but who most probably never found it. The dead man had been very well dressed for an Indian, but no money was found in his clothes or any paper whatever by which his identity might be established. The jury of course found that an unknown man had met his death by unknown means. Those present gave the skeleton as decent a burial as circumstances permitted.

This is the year to wrestle Oklahoma from republican rule under which it has groaned since its organization. By taking the legislature out of their hands a tax rate which has well nigh driven property from the territory will be reduced until the people can bear their public burdens and have something left on which to feed and clothe and educate their little ones.

No Boycott Goes

The threat to boycott The Sunbeam because it cannot be dictated to is of little interest to the public or the management of the paper, for the paper will be conducted with such manifest fairness to every citizen of the county as to convince every fair-minded man that it is worthy the support of everyone who only has the good of the county to consider and that it is published in the interest of the entire people. The effort being made however to withdraw trade from Thurmond Bros because they have political and personal preferences of their own, is wrong in every sense of the word. They are free taxpaying citizens and have a right to their political ideas just the same as any other business man here, and any effort to injure a man's business because of his political views will be promptly condemned by this paper and by the public generally. Let Thurmond Bros., Hodges & Bradford, Mr. Morris, John Gober, Colburn & Stahl or anybody else entertain their own free ideas as to what is best for the county, and let it make no difference in their business relations. Any other course is contrary to civilized politics.

Our School

Our school board has been fortunate enough to secure the services of Prof. JD Hutton as principal of the Cheyenne school for the term commencing Sept. 14th. Prof Hutton is an educator of well known ability, and his name is a guarantee that the school will be successfully managed. The prospects are that the school will be very largely attended and an able assistant will be selected by the board. Everything points to a general awakening in school interests and to the building up of a good educational system in our city.

A FREE SILVER CLUB

Enthusiastic Gathering of Friends Of Silver A big Club Organized

A good sized audience filled the school house last Saturday in response to the call of citizens for a ratification meeting to endorse the action of the national democratic convention. The meeting was called to order and its subjects briefly explained, after which GR Graves was elected chairman and DW Tracy chosen secretary.

On motion a committee consisting of Robt Banks, WB Stovall, EE Tracy, JW Putman and PS Taylor was appointed to draft resolutions expressive of the sense of the meeting.

While the committee was out, in response to calls, Judge Jno B Harrison entertained the meeting with an eloquent speech in which he fully endorsed the action of the convention and severely criticized bolting democrats and those populists who refused to ratify the action of their convention in supporting Bryan. At the close of the judge's remarks the committee reported a set of resolutions strongly endorsing the democratic national ticket and platform. The resolutions were adopted without debate, and then it was resolved to go into the organization of a Bryan Free Silver club and a resolution was adopted requesting the democratic chairmen of the different districts to organize similar clubs in their respective districts. The organization of the club was effected by the election of JW Putman permanent president and John B Harrison secretary.

Time was given for the secretary to get a list of the names of those present who desired to become members of the club, and fifty-three members were enrolled on the spot.

On motion of John B Harrison the chair was instructed to appoint a committee of five to draft laws by which the club shall be governed in the future. The chair appointed as such committee John B Harrison, John E

Mr. and Mrs. JA Colburn and Jeff Colburn returned Tuesday from a two months visit to their relatives in the Indian Territory. They are glad to be once more among their prosperous old friends, and say that this is the only county they have seen which is not badly off in the way of crops on account of the drought which prevails all around us.

JW McMurtry, Esq. returned yesterday from a visit to our neighboring county capital, Grand, where he has been attending to the legal affairs of a client. Judge McMurtry states that the citizens of Day County have refused to vote a tax to rebuild their destroyed court house and that there is a very strong sentiment there for a coalition with this county in order that taxation may be reduced to the lowest possible rate.

United States post office inspector Frank Babeer was in the city Saturday on a general tour of inspection. He complimented first-assistant postmaster Clarence Thurmond very heartily on the condition in which he found the affairs of his office, declaring that he had not visited another office in which the books were so neat and well kept. From here he went to Doxey, and found that postmaster JE Pullen was also deserving of high compliment on account of the accuracy and promptness which characterized his office.

A Change

Ed Sunbeam:

A Trip to the Agency

The ruling spirit to roam and ramble is always so strong in me that I can never refuse a chance to go somewhere, and so Wednesday morning when I was offered a seat in the buggy by the side of Clebe Thurmond for a day's outing including a visit to the Washita Indian agency, I never once thought of

declining the invitation. A glorious shower had fallen the night before, the freshened grass sparkled in the sunlight, and a perfume as of Eden swept over the plains as we bowled over the prairie eastward.

Some twenty miles down the Washita we came upon the teepees of the Cheyennes and were soon at the residence of Mr. JH Hammon, the agent, who, with his family, has resided there nearly three years. Mr. Hammon has been very successful in the management of the Indians and has very materially improved their condition. When he came there, only five acres of land was in cultivation, and now he has three hundred and thirty-three acres under a fair state of cultivation, while some of the Indians have good sized individual farms which they are cultivating with fair success. With one or two exceptions the Indians have no cattle, and these have only five or six head. They have, however, a superabundance of ponies which are practically worthless.

There are about 175 Indians on the reservation, about forty of that number being men, and about half of whom work cheerfully under the direction of the agent, the other half being pullbacks. White Shield is now the principal chief, or at least the one of greatest influence, though there are a number of other petty chieftains with more or less following.

The government has contracted for a \$12,000 school house, the erection of which is to commence at once, and there are about sixty-five Indian children to be educated there.

The Cheyennes are just now a little ugly on account of the new regulations in the issuance of beef. Formerly the beeves were delivered alive to the Indians, who slaughtered them themselves, now however, the government has ordered the beeves to be received and weighed at Cantonement and then turned over to the agent who is to butcher them and issue the meat to the Indians dressed. The Indians flatly refuse to receive it in this fashion and Mr. Hammon firmly refuses to issue it to them

any other way, and consequently the beeves remain in the agency pasture un-slaughtered, and the Cheyenne complain loudly that they have no "wa-ha" no "chuckaway," and are by no means in a good humor with the agent. Wednesday evening they were gathering from all quarters at Big Bear's camp for a dance and seemed altogether in a mood to make an ugly bluff. It is safe to say however that Agent Hammon will have his own way.

Quite a civilized marriage occurred at the agency last Friday. The high contracting parties were Mr. Robt Big Bear and Miss Bear Woman, daughter of White Spoon. The match had the romantic feature of being an elopement, and the wedding took place at the agent's residence. The ceremony was pronounced by Rev Edgar Simms of the Methodist Church, the bride, being given away by Agent Hammon.

A pleasant chat with the agent, a fruitless attempt to dicker with the Indians for moccasins, a lunch under a spreading elm, partially shared by a buck or two who complained of want of chuckaway in their own wigwams, and then home again.

Let us see what can be done in this line.

♦♦♦

The dry weather of the past few weeks will have done some good if it puts people to thinking and working to mitigate its effects in the future. Those who comfort themselves with the reflection that this is the worst season for many years and not likely to be repeated for years to come are those least familiar with the history of this country. It is dry this year, and has been dry before and will be again, and the man who goes right to work now with the full determination to reduce as far as possible the loss concerned by dry weather is the one who will have least to complain of in the future. Windmills have been suggested as a means for furnishing water from below the surface for the use of stock on the high summer ranges, but there is a less expensive and equally practicable method—the construction of dams on all the small creeks and draws of our county. There is scarcely a section of land here where, by the exercise of a little judgment and labor, such dams could be built at little cost and in time that would be otherwise wasted in hunting up famished stock and feeding those which had been

Cheyenne Needs

A good blacksmith.
A good shoemaker.
A good drug store.
Less political agitation.
More harmony in business matters.
Fewer grumblers.
A little rain.
More cash and less credit business.
Some level headed sensible people who regard the general prosperity of the county more than petty personal matters.

Party Methods

The Sunbeam has no war to make on any candidate for office in this county. Generally speaking the various candidates are among our best citizens and the county is to be congratulated that in case of success of either ticket there is little danger of bad men getting control of municipal affairs. But we unhesitatingly condemn as injurious to county interests the course of the gentleman calling himself the head of the democracy of the county in needlessly stirring up prejudice and bad feelings by unjust insinuations of dishonesty of those who fail to agree with him in party methods. His statement that there is one—emphasizing the one—honest candidate who is not running under the system provided by his committee, is a wanton and unjustifiable insult to those gentlemen who are asking for office and submitting their claims directly to the people. If he knows of any dishonest act of any candidate it is his duty in the role of guardian of the county which he seems to have assumed to make it publicly known that voters may cast their ballots intelligently for good men, and if he is not in position to make direct charges he ought to be wise enough to know that general insinuations of dishonesty unsupported by proof of any kind is not the weapons of a

brave and frank political opponent. The Sunbeam does not believe that only one of the numerous candidates running for office without his certificate of character is honest, and the people who deal daily with the other candidates on the Independent ticket will not believe that they are dishonest until some tangible proof is given them.

Again, the assertion made here last Wednesday that corrupt men will center on independent candidates is a foolish insult to the hundreds of good citizens who think they have enough to vote without direction from any set of men.

Nor does it help this county in the eyes of the world generally for the gentleman calling himself the head of the democratic party to continually prate of the dishonesty of our citizens, when the fact is there is not a more quiet, law abiding citizenship in any county in the union than Roger Mills County can boast of.

When the gentleman learns that people may differ with him as to party methods and still be honest he will be more competent to boast of being the head of the democracy of the county.

Mr. JH Hammon, the Indian agent at the Washita agency, was in the city Tuesday renewing acquaintance with old friends. He states that the Cheyennes are still stubborn about receiving their beef unless they are allowed to butcher it themselves, and that consequently their beef rations are yet saved to the government. A few however, have expressed a willingness to accept his terms and for these he will slaughter and issue. Those who hold out against his rules will get no wa-ha.

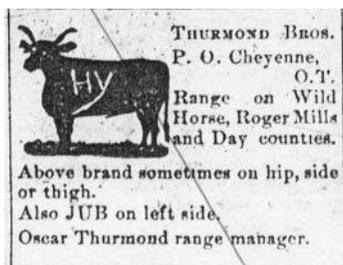

John Reed has just returned from a trip to Kansas City where he has been attending to the marketing of some cattle. He promises to remain with us in the future.

Alfred F. Smith and F. Lowdermilk, two Sweetwater citizens, were in the city early in the week proving up on their claims.

Wm Hext and Jeff Price returned Sunday from Kansas City, where they disposed of some very good cattle on a fair market.

Oscar Thurmond is gathering beeves and will ship from Gage about the first of the month.

Chas Hensley and Henry Thompson returned early in the week from Mangum, where they went to enjoy the big three day picnic.

WW Duke and Stoney are on the road to the shipping pens at Gage with some fat beeves.

Mr. JS Gober, in returning from a business trip to Canadian last Friday was overcome with heat and taken so violently ill that he had to have assistance in reaching home, where he was confined to his bed for several days. He is now however able to be about and is safely convalescent.

Sheriff and Mrs. WB Johnson returned Tuesday for Wichita, Ks. where Mrs. Johnson has been receiving medical aid. It is pleasant to note that she seems entirely restored to health, except for natural weakness resulting from treatment which will, it is confidently hoped, disappear under the ministrations of so many friendly hands. WB himself looks as hearty as could be wished and seems happy to be among his own people again.

Mr. Champ Davis, one of the best citizens of the county, is a candidate for county commissioner from district two. Mr. Davis is a prudent, intelligent and conservative business man whose services as commissioner the county will be fortunate to secure, and in whose hands all interests will be safe.

Mr. EK Thurmond left last week for Kansas City and other wholesale centers to lay in the biggest fall and winter stock of goods ever seen in Cheyenne. Thurmond Bros. mean that there shall be no excuse for anyone going from home to buy anything which can be kept in a general supply house.

A New Post Road

One of the greatest needs of this immediate section is a postal line connecting this city with the Rock Island railroad outlet, and considering the short distance over which the line would run and the number of people to be served, it is quite strange that this line has not already been established. A line connecting this place with Hammon, only twenty miles east of here over a good road, is all that is needed. From there a line connects with the eastern mails generally.

At present a letter addressed to a citizen in the eastern part of this county has to around via Canadian through Kansas, thence south to Arapahoe and then to Hammon, only twenty miles from here. In a word, the eastern part of this county is practically cut off from mail communication with the county seat. It is the intention however to remedy this state of affairs, and postmasters Thurmond of this

place and Hammon of Hammon have agreed to interest themselves in an effort to have the department at Washington establish a route as herein indicated.

The Normal School for Oklahoma at Edmond

The Normal school for Oklahoma, situated at Edmond, on the Santa Fe RR, about midway between Guthrie and Oklahoma City, is one of the educational institutions of which this territory has just cause to be proud.

The catalogue, an unusually neat piece of work, now lies before us.

Last year about 160 students were enrolled, the session closing with about 130 in regular attendance, certainly a remarkable showing, and one that attests, in strongest terms, the ability of the faculty and the vigor and success of the management of the board of regents.

Tuition is free, as is also instruction in music—an unusual and praise-worthy feature. The faculty is full and well organized.

Two courses of study are offered; first, the “Introductory,” to which pupils from the district schools may obtain entrance; and second, the “Normal,” for older and more advanced students. The “Introductory,” it seems to us, fills the gap between our district schools and higher work in any of our territorial institutions, while the “Normal” is admirably adapted to the training of teachers. Special arrangements are made for the graduates from the public schools and for teachers who wish to obtain county certificates.

The diploma is a five-year certificate for the territory, renewable by the territorial superintendent upon evidence of satisfactory work in teaching.

Board may be obtained in private families at rates ranging from \$2.00 to \$3.00 per week.

Students who rent rooms and board themselves live at an expense much lower.

The president of the school, Prof. Edmund D. Murdaugh, and the secretary of the board, Hon. J.L. Mitch, state, in the catalogue, that any further information will be furnished with pleasure.

They may be addressed at Edmond, Okla.

A delightful social and literary entertainment was given last Monday night at the pleasant residence of Mrs. AS McKinney in the suburbs of the city. The following interesting program kindly furnished by a fair participant was carried out much to the enjoyment of those present:

Program

1st Social Chat
2nd Music by Mr. DW Tracy
3rd Euchre playing by some of the young people.

4th Music by Miss Pearle Cunningham

5th Led by Mr. Charlie Miller and Mr. Clarence Thurmond, a few of the young couples repaired to the buggies, where some of Oklahoma's largest watermelons were neatly stored away. After partaking heartily of the watermelons the young folks climbed into the vehicles and spent pleasant conversations under the silver light of an August moon. Alas! all joys must fade. We were soon called to the house to hear the recitations.

1st We listened to a recitation by Miss Pearle Cunningham "An Order for a Picture."

2nd Recitation by Georgia Kirkman.

3rd Recitation by Miss Jessie Miller.

4th Playing on the harp by Messrs Tom Chilton, Newt Jackson and Clarence Thurmond, accompanied by Mr. DW Tracy on the organ.

After another pleasant chat we bid our hostess adieu and turned our faces homeward to dream of the hasty hours which passed so pleasantly. But, boys, don't forget to bring your girl, or some other fellow's girl, next

time. Don't let some nice girl stay at home because she has no way of coming.

The Berlin Picnic

As usual at all social gatherings in Roger Mills County, the crowd which attended the Berlin picnic last week was large, merry and enthusiastic. The barbequed meat was done to a turn and in bountiful supply, the dancing platform was smooth, well shaded and pleasantly situated, and a general good time had. We understand that there were those present who would willingly have talked to the dear people on the issues of the day, but were prevented from doing so by the fact that the dancers occupied the platform and wanted to dance and to continue dancing from morning till night, but they didn't want to

dance in the sunshine. The speakers also having a predilection for shade, the wishes of the two conflicted and the dancers won. Thus were the hopes of a talked of candidate for representative from Greer County deferred. They say that hope deferred maketh the heart sick, but, if we are correctly informed, it wasn't the candidate who was sick. If you want to know who it was just mention “chicken” to some of the boys who didn't go to bed at regulation hours that night.

If any of the above is based on fiction, we are willing to retract or affirm as the case may be, because we were not present and have had to rely upon information obtained from those who were. It may be well enough however, to remark that some prominent young men of our city did certainly look very gaunt for a few days. There's no danger of their going into a decline, however; if you think so just ask 'em to take one and see.

Whilst all this fun was going on in our neighboring city, Cheyenne looked like Goldsmith's “Deserted Village” or a western graveyard. Nearly all our citizens had gone to the picnic, and those left were dull and lonesome, and had it not been for the foresight of one, we would have been dry also.

District Court

The officers of the district court arrived here Wednesday evening, a day earlier than expected. This was owing to the fact that the records of Day County had been destroyed by fire, consequently but little business was to be done.

The court comprised of Judge JC Tarsney, Clerk JH Warren, US Assistant Attorney Roy Hoffman, Stenographer JP Ewen, Marshal L. Eifehoff, and Bailiffs Ed Hines and MP Behen.

Court opened this morning with the following jurors present:

Grand Jurors

SD Rude, AW Anderson, W McAnerny, JM Vanderpool, BF Dudney, WW Duke, FT Sutton, JR Davidson, SJ Wiley, F McGinnis, T Thompson, WG Beaty, WC Morris, F Tunnard.

We publish today a copy of the ballot to be used at the coming election containing the name of candidates in each party. The importance of the coming election can hardly be overestimated and every good citizen should not only turn out and vote but he should give serious consideration to the claims of the candidates and vote for those only that he considers best qualified to carry on our county government. A single vote cast without due consideration may work untold injury on not only the voter but the county generally. All the candidates are well known to the people and they should be judged on their records. Beware of reports circulated at

the last moment, and pay attention to them. Everybody has had a chance to say openly all they should on such occasion, and the man who will start reports at a time when it is impossible to investigate their truth by such act proves himself to be unworthy of credence.

Roger Mills County probably contains more solid, well-to-do citizens, according to population, than any other county in the Territory. Nearly all our settlers have more or less cattle and the number who has from fifty head upwards is large. This is a very satisfactory state of affairs, at the same time we want to have all our settlers prosperous, and the columns of this paper are always open for suggestions from any source likely to be of general interest and benefit. In this connection we wish to say a few words on a subject which will interest the poorer class in our county. We have lots of farmers who have been depending almost entirely on corn for a money crop, and to such we would suggest that two crops are better than one, and that during the past four years experiments have been made here with cotton as a poor man's money crop, and in each trial the result has been more satisfactory than with corn. We do not however advise the neglect of corn crops, but would simply endeavor to persuade those who have to depend on corn to add the cotton crop thereto. There will always be a good market here for corn and fodder crops, because, with the settlement of our county stock-feeding will become more general; but we all know that the man who depends entirely on the sale of those crops for money with which to purchase the necessaries of life has a hard row to hoe. What such men want is something that will bring cash any day in the week and that is not too bulky for hauling long distances. Such a crop is cotton, and right here in Cheyenne is the place to have a gin and a cotton market. Not alone is the money in the lint, but here in the heart of a great stock-feeding range the cotton-seed would be more valuable than corn as feed and

would find a ready sale. Let every one of our farmers put in all the corn they can next spring and after they have done so let each one put in a goodly sized patch of cotton.

Report of the Governor of Oklahoma

We give below a few extracts from Gov. Renfrow’s annual report:

The development of the Territory in the year past has been equal to if not greater than that of other portions of the United States.

The acreage of land in cultivation has steadily increased and has very nearly reached the proper ratio of farm to land to pasture. The prospect for crops is good, and the antebellum declaration, “Cotton is King,” seems applicable to Oklahoma.

The climate is delightful, except for a short period in midsummer. The spring, fall and winter weather cannot be excelled anywhere. The atmosphere is dry, but never sultry. The population has steadily increased since the last census in 1894, when it was 212,625.

Population by counties:

Beaver	*4,778
Blaine	6,415
Canadian	12,837
Cleveland	13,000
D	2,986
Day	611
G	5,296
Garfield	*16,092
Greer	*8,500
Kay	*16,959
Kingfisher	15,346
Lincoln	16,542
Logan	19,005

Nobel	*13,409
Oklahoma	19,999
Payne	14,192
Pawnee	8,293
Pottawatomie	17,300
Roger Mills	1,267
Washita	5,404
Woods	10,805
Woodward	*7,487
Reservation	12,500

*Not yet reported. These are taken at the same figures as those reported two years ago.

Statehood—This question has been so much and so ably discussed, both by the press and in the halls of congress, that it is unnecessary for me to enter into a discussion of the question, but I beg to express my firm conviction that the best interests of the whole people will be sub-served by the early admission of Oklahoma and Indian territories into the union as one state. United they would make one strong and prosperous commonwealth; divided, two small states with double the expense of state government.

All taxes unpaid by the third Monday in December become delinquent and a penalty will be added thereto.

GW Hodges,

There is hardly a day passes but what we hear of some settler selling out his claim at a fair figure. In nearly all cases they sell to well-to-do stockmen who appreciate the fact that our county has just what the cattle man needs—plenty of water, grass and shelter.

Now is a good time to plow fireguards. In fact it's good for any kind of plowing, the recent rains having put the ground in excellent condition.

Persons who have real-estate should mention that fact to the treasurer when they pay their taxes; otherwise they are liable to blame the treasurer when their real-estate is advertised for sale. Personal and real-estate taxes are kept on separate rolls in this territory which leads to much confusion.

Masterson and Hamilton, the Panhandle stockmen, are having fire guards plowed

beside their drift fence in the southern portion of this county.

OL Johnson has moved his sawmill back into this country and is now located just above Red Moon on the Washita. He will locate on his claim in Custer Bend in a short time.

Mrs. McMurtry has returned from an extended visit to relatives in Illinois.

DW Tracy has gone to visit his children near Vernon, Texas. He will spend a few weeks there and then look out a location.

Someone let out a prairie fire Monday night south of the Palo Duro, burning a strip of range over a mile wide from the Texas line to near George Barnett's place. The settlers over that way, and the Pigpen outfit, fought the fire nearly all night. The range is our fortune in this country and every means should be used to protect it, and one good step in that direction would be a way to detect the parties setting out these mysterious fires.—*Hardesty Press*
